

TECK VISITOR POLICY

The tour will support no more than **a maximum of 50 people** who **must be physically capable of extensive walking and stair climbing while wearing the required personal protective equipment.**

- Participants must arrive together on a bus arranged by the Conference committee. Trail Operations will not make these arrangements.
 - We will supply coveralls, hard hats, safety glasses, respirators and ear protection
 - **Tour participants must bring their own steel-toed boots that meet CAN/CSA standards with a Grade One (1) rating (the boots will have such a tag on them at point of purchase), in addition to being all-leather (no synthetic material such as mesh) and be above the ankle. Steel-toed Blundstone boots do not meet the requirements. Also please note that if a boot has the Grade One (1) rating but isn't leather and doesn't come above the ankle, it will not meet our requirements.**
 - Trail Operations' Facial Hair Standard applies to visitors as well as employees. As such, **visitors who do not meet the specific requirements as I will outline below will not be permitted on site.** The bus will be met at our Main Gate entrance and anyone not meeting the standard will be asked to disembark from the bus and will be provided with transportation to downtown Trail for the duration of the tour. It will be your responsibility to make arrangements to reconnect with those individuals at the end of the tour.
 - Participants will be given half-face respirators. Trail Operations' Facial Hair Standard applies to visitors as well as to employees. As such, **visitors who do not meet the specific requirements will not be permitted on site. Visitors must ensure that they are clean shaven where the respirator seals with the face**
- In particular, razor stubble, beards, sideburns and hair on the chin specifically do not meet our standard. The attachment outlines what style of mustache and lower lip hair is acceptable. To ensure they meet the standard, it is recommended that participants shave the morning of the tour.
- Teck Trail Operations supports a tobacco-free environment. The possession and/or use of tobacco products (including E-cigarettes and vapours) throughout Teck Trail Operations is strictly prohibited. This includes in backpacks, purses, etc. and on the bus.
 - **Use of mobile communication devices while on tour is prohibited (talking or texting on these devices in the production plants).**
 - Certain facilities within Trail Operations are sensitive areas for medically implanted electronic devices. You will see that the attached Personal Protective Equipment spreadsheet requires participants to note if they have such a device.
